WALT DISNEY COULDN'T HAVE DONE IT BETTER!

"The end product is as good as what you see on the typical local cable news show. And the whole thing is simple to learn and easy to use, which can't be said about many animation programs.

DeluxePaint III is so easy that you really don't need strong artistic skills to create useful animations."

— Compute!, Mar 89

PRESENTING ANIMPAINT™

DeluxePaint® III makes animation easy. With the AnimPaint feature, you can create animation just by pressing one key to record your paint strokes, and another key to play them back. You can also use any multi-cel animation as a brush and paint with it, even in full 3-D.

8 NEW PAINT FEATURES

DeluxePaint III also adds sophisticated features to the number one Amiga paint software:

Extra-halfbrite support for 64 colors; direct overscan painting for desktop video; wrap and tint brush modes for special effects; precision airbrush painting; better font support, letting you preview unlimited fonts in any size or style; compression mode, letting you create impressive animations with just 1 MB of RAM; ANIM file format for compatibility with most popular animation programs; and many performance enhancements, including faster perspective.

TO ORDER
